AI Ethics Policy

Effective Date: 15/06/2025

BroFessor is committed to responsible and ethical development and deployment of AI technologies. This AI Ethics Policy outlines our principles and commitments.

1. Human-Centered Design

Our AI systems are designed to augment human learning, not replace it. We prioritize user autonomy and decision-making.

2. Transparency

We strive to ensure that users understand when they are interacting with an AI and how it works. We provide clear documentation and disclosures.

3. Fairness and Non-Discrimination

We actively work to prevent bias in our AI systems. We audit models for discriminatory behavior and use diverse datasets to train and evaluate them.

4. Privacy and Data Protection

We build our AI to handle data responsibly. Personal data used in AI interactions is protected according to our Privacy Policy and applicable laws.

5. Accountability

We maintain human oversight over AI systems. Users can contact us to address concerns, and we regularly evaluate AI performance and impact.

6. Safety and Security

We implement safeguards to prevent AI misuse and abuse. We monitor for adversarial behavior, misinformation, and harmful outputs.

7. Continuous Improvement

We invest in research and community engagement to improve the ethical performance of our AI over time.

8. User Empowerment

Users can choose the extent of AI involvement in their learning process. We provide tools for feedback and control.

9. Prohibited Uses

Our AI must not be used to:

- Generate misinformation or deepfakes;

- Manipulate users or impersonate individuals;

- Engage in illegal, hateful, or violent behavior.

10. Contact and Feedback

We welcome feedback on our AI Ethics Policy. Please contact us at Nilton.novele@gmail.com
